

There is no such thing as a free Discovery Service! Or is there?

GÉANT eduTEAMS offers a Discovery Service for free. It is very easy to use for both users and eduGAIN service provider administrators. Its user interface is easy to use and currently supports ten languages. The source code is publicly available on Github, but you don't need to run it on your own. Just use the GÉANT eduTEAMS instance on <https://discovery.eduteams.org>.

SIRTFI? CoCo? R&S? Yes, we can!

The list of displayed identity providers can be filtered by various criteria, including entity categories like the GÉANT Data Protection Code of Conduct or REFEDS Research & Scholarship categorie or SIRTFI. You can change the list of Identity Providers at any moment using a web interface to easily create the filter expression.

Can I count on it?

Yes, the service is running on a very stable and reliable infrastructure. Acutally, the same infrastructure that is also used by eduID.cz. Servers are on different geographic locations. We didn't have downtime for couple of years. The servers are operated in different and we haven't had a downtime for a couple of years.
